

Abstract of the Disclosure

Facilitating the exchange of information among applications (e.g., business support systems or operational support systems or a combination thereof) may involve receiving a data object from a first application, using a first controller to route the received data object to a first transformer, using the first transformer to transform the data object from a first format used by the first application into a common format object, publishing the common format object to a communication channel, receiving a request from a subscribing application to subscribe to the communication channel, using a second controller to route the common format object to a second transformer, using the second transformer to transform the common format object into a data object in a second format used by the subscribing application, and sending the data object in the second format to the subscribing application.
